

COMPLETE GUIDED SURGERY

SIMPLIFY YOUR MOST COMPLEX TREATMENT PLANS

The kit allows you to insert Naturactis implants from diameter 3.5 to 4.5 and length 6 mm to 14 mm.

All clinical indications can be performed with this kit:

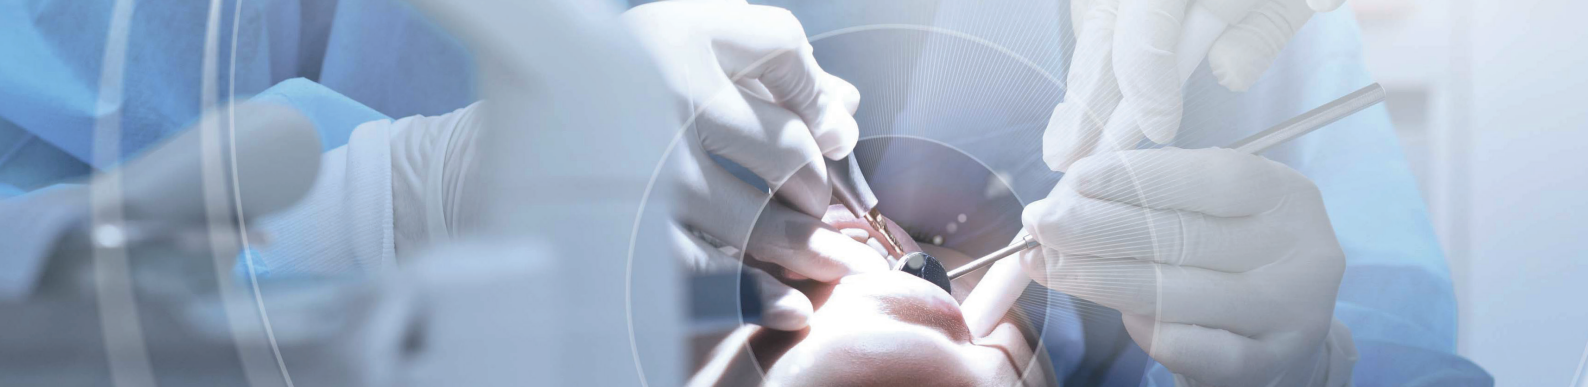

From single-unit case, partial to total edentulism

From immediate functional loading on the framework to deferred loading

From a conventional prefabricated prosthetic system to a custom prosthetic system through CAD/CAM

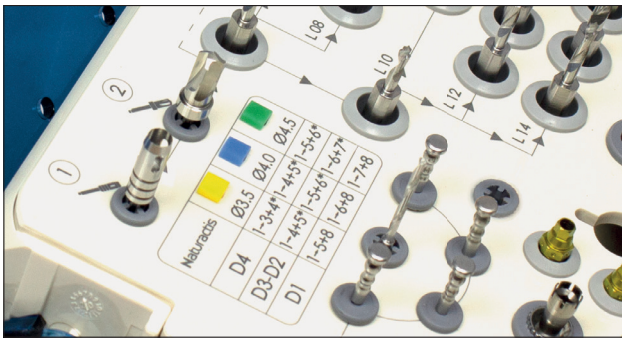

Made in France

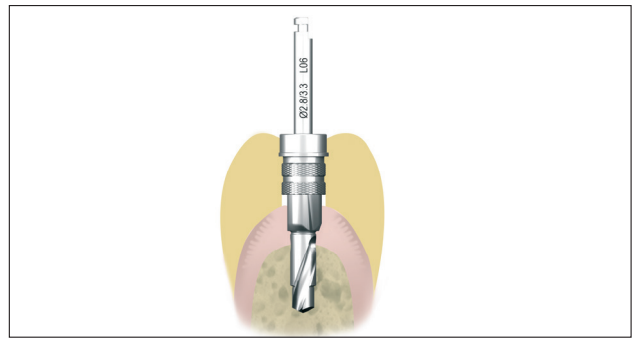

100% CUSTOMIZED GUIDED SUPPORT FROM PLANNING TO INSERTION

CLEAR, FLUID PROTOCOL

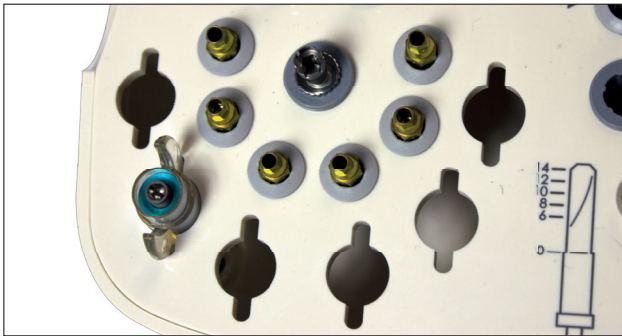

The kit has a range marked by arrows that tells you the series of drills to use.

A GUIDED DRILL RIGHT FROM THE START

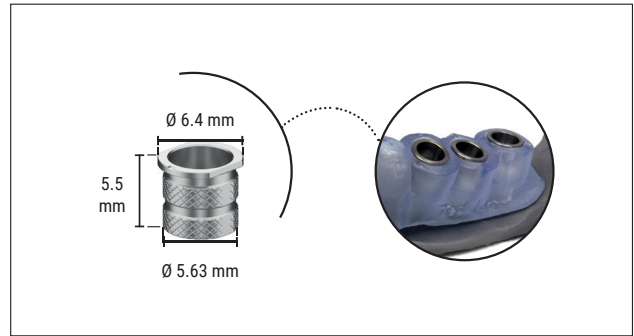

With self-guided drills, including the shortest versions, the complete surgical kit ensures simple and effective guidance.

A LOCATION FOR YOUR IMPLANTS

The kit includes arched locations to place the tubes with the implants in the correct order, in line with the planning to ensure a smooth protocol from bone marking to implant insertion.

A SINGLE RING SIZE

The guide ring is one size, avoiding any handling of additional spoons or rings. This makes it safer to handle the guide.
